Curriculum Evaluation

The Board of Education shall direct a continuing evaluation of the curriculum as part of a program of instructional improvement.

All aspects of the curriculum shall be subjected to a searching and critical analysis in an attempt to improve the learning and growth of students.

The administrative staff shall evaluate the curriculum in a systematic manner, involving school personnel and others as appropriate.

SUBJECT: FIRE DRILLS, BOMB THREATS AND BUS EMERGENCY DRILLS

Fire Drills

The administration of each school building shall provide instruction for and training of students, through fire drills, in procedures for leaving the building in the shortest possible time and without confusion or panic.

Fire drills shall be held at least twelve (12) times in each school year; eight (8) of these shall be held between September 1 and December 1. At least one (1) of the twelve (12) drills shall be held during each of the regular lunch periods, or shall include special instruction on the procedures to be followed if a fire occurs during a student's lunch period.

At least two (2) additional drills shall be held during summer school in buildings where summer school is conducted and one of these drills shall be held during the first week of summer school.

After-School Programs

The building principal or his/her designee shall require those in charge of after-school programs, attended by any individuals unfamiliar with the school building, to announce at the beginning of such programs the procedures to be followed in the event of an emergency.

Bomb Threats

School Bomb Threats

A bomb threat, even if later determined to be a hoax, is a criminal action. No bomb threat should be treated as a hoax when it is first received. The school has an obligation and responsibility to ensure the safety and protection of the students and other occupants upon the receipt of any bomb threat. This obligation must take precedence over a search for a suspect object. Prudent action is dependent upon known information about the bomb threat - location, if any; time of detonation; etc. If the bomb threat is targeted at the school parking lot or the front of the school, building evacuation may not be an appropriate response. If the bomb threat indicates that a bomb is in the school, then building evacuation is necessary unless the building has been previously inspected and secured in accordance with State Education Department Guidelines and as incorporated in the School Emergency Management Plan and administrative regulations.

The decision to evacuate a building or to take shelter is dependent upon information about where the bomb is placed and how much time there is to reach a place of safety. Prudent action dictates that students and other occupants be moved from a place of danger to a place of safety. Routes of egress and evacuation or sheltering areas must be thoroughly searched for suspicious objects before ordering an evacuation. Failure to properly search evacuation routes before an evacuation takes place can expose students and staff to more danger than remaining in place until the search has taken place.
Assistance is available from local police agencies and the New York State Police to train staff to check evacuation routes.

SUBJECT: FIRE DRILLS, BOMB THREATS AND BUS EMERGENCY DRILLS
(Cont'd.)

Police Notification and Investigation

A bomb threat to a school is a criminal act, which is within the domain and responsibility of law enforcement officials. Appropriate State, county, and/or local law enforcement agencies must be notified of any bomb threat as soon as possible after the receipt of the threat. Law enforcement officials will contact, as the situation requires, fire and/or county emergency coordinators according to the county emergency plan.

Therefore, the building administrator or designee is to notify local law enforcement officials and follow established procedures to move all occupants out of harm's way.

Implementation

The Board of Education directs the Superintendent or his/her designee to develop administrative regulations to implement the terms of this policy. Additionally, such regulations are to be incorporated in the School Emergency Management Plan, with provisions for written notification by October 1 of each school year to all students and staff about emergency procedures, an annual emergency drill, and the annual updating of the School Emergency Management Plan as mandated pursuant to law and/or regulation.

Bus Emergency Drills

The Board of Education directs the administration to conduct a minimum of three (3) emergency drills to be held on each school bus during the school year. The first drill is to be conducted during the first week of the fall term, the second between November 1st and December 31st, and the third between March 1st and April 30th.

Each drill shall include instruction in all topics mandated by the Education Law and the Commissioner's Regulations and shall include, but will not be limited to, the following:

a) Safe boarding and exiting procedures;

b) The location, use and operation of the emergency door, fire extinguishers, first aid equipment and windows as a means of escape in case of fire or accident;

c) Orderly conduct as bus passengers.

Students who ordinarily walk to school shall also be included in the drills.

SUBJECT: INTERNET USE

Internet access is now available to students and teachers in the Huntington Union Free School District ("District"). The District and Western Suffolk BOCES ("BOCES") are very pleased to access this service and believe that the Internet offers vast, diverse, and unique resources for both students and teachers. The goal of the Board of Education in providing this service to teachers and students is to promote educational excellence in schools by facilitating resource sharing, innovation, and communication.

The Internet is an electronic highway connecting thousands of computers all over the world and millions of individual subscribers. The key concept underlying the Internet is interconnectivity—something that will allow administrators, teachers, and more importantly, students to access an unparalleled array of communication and information sources. Students and teachers have access to general Internet tools including, but not limited to electronic mail (e-mail); Listservs; UseNet News; File Transfer Protocol, (FTP); Telnet; Gopher and the World Wide Web. The electronic search tools enable students and teachers to, for example:

a) Communicate with people all over the world;
b) Access information and news from NASA as well as the opportunity to correspond with scientists at NASA and other research institutions;
c) Retrieve public domain software and shareware of all types;
d) Join discussion groups on a plethora of topics ranging from Chinese to culture to the environment to music to politics; and

e) Access many university library catalogs, the Library of Congress, and ERIC.

With access to computers and people all over the world also comes the availability of material that may not be considered to be of educational value in the context of the school setting. As such, BOCES and the District have taken precautions to restrict access to controversial materials. However, in a global network it is impossible to control all materials and an industrious user may discover controversial information. We strongly believe, however, that the valuable information and interaction available on this worldwide network far outweighs the possibility that users may procure material that is not consistent with the educational goals of the District.

Internet access is coordinated through a complex association of government agencies, and regional and state networks. In addition, the smooth operation of the network relies upon the proper conduct of the end users who must adhere to strict guidelines. These guidelines are provided here so that the user is aware of their responsibilities.

In general, this requires efficient, ethical, and legal utilization of the network resources. If a District user violates any of these provisions, his or her account will be terminated and future access to the Internet will sign a letter of user agreement. Signature(s) is (are) legally binding and indicates the party (parties) who signed has (have) read the terms and conditions carefully and understand(s) their significance.
