Mrs. Robinette, Director of Math and testing K-12 will be hosting a parent math workshop for Woodhull.

Parents are invited to learn about how the new Common Core Math is being taught and learn strategies to help your child with homework or studying for tests.

The workshop will run from
6:30pm – 7:30pm
before the PTA meeting on January 14th

Common core math is a new way of learning math. Students are taught to move from concrete to pictorial and then to abstract ideas before being introduced to traditional algorithms.
