

Huntington School District Has Been Selected to Report Student Weight Status (BMI) During the 2013-14 School Year

The Huntington School District has been selected to participate in the NY State Department of Health's Weight Status Survey. The survey information assists health officials to develop programs that make it easier for children to be healthier. The survey only collects Body Mass Index (BMI) for submission to New York State. No names or information about individual students is disclosed. You may choose, however, to not have your child's BMI data included in this report by completing and sending a signed opt out letter to your school nurse on or before December 2, 2013. If you have any questions regarding this survey, please contact your child's school nurse.
