

## SHARED DECISION MAKING COMMITTEE

# *2020-2021 School Based Team Goals*

List each goal on a separate form

### SMART Goal:

In an effort to foster an environment where students feel safe, and that their social-emotional needs are supported, each classroom teacher will actively conduct a daily “class meeting”. This time will offer students a warm, accepting, and open forum to express their thoughts and feelings. This time also offers an opportunity for both the teacher and students to collaborate with one another in problem solving efforts when needed. Teambuilding and the development of positive peer-to-peer, and peer-to-teacher relationships, are anticipated outcomes as well. Through these meaningful classroom discussions, students will develop empathy, so they can enhance their relationships with their peers. By June 2021, Jefferson students will be able to identify at least one method available to them for expressing their feelings (i.e., post it on the ear poster, class meeting, signal to teacher, etc.) as measured by individual responses to a survey administered to students in grades two and three (two times during the school year).

### Action Plan:

- Each classroom teacher will have a designated class meeting where students can express their thoughts and feelings.
- Each teacher will display a poster with an ear where students can signal the teacher using a sticky note that they need to speak with the teacher privately.
- Classroom teachers will incorporate age appropriate read alouds that focus on feelings. As a result, students will be able to articulate different feelings and ideas shared in these texts.
- Students will develop problem-solving skills by participating in classroom activities, where they will demonstrate an understanding of large and small problems and demonstrate the steps to solve a problem.

### Assessment:

- School created survey given to students in grades 2 and 3 twice a year.
- Teacher and parent feedback.
